TRENTINO - ALPS - ITALY

Welcome to **Trentino**, the butterfly-shaped province of Italy! Here, the predominance of mountains, the variety of climates, and the influence of the German culture fostered the development of distinctive identities. Today, Trentino is home to a vibrant community that honors this rich heritage and has undertaken its path to the future through innovative social and ecological practices.

After spending about half of our lives far from our native country, we created **Dolomit** to welcome international students and faculty in this unique corner of the world that we call home. We are convinced that Trentino, thanks to its history as a borderland and its exceptional natural features, is an ideal location for rewarding educational programs.

Our knowledge and enthusiasm is **at the service of our patrons** in every stage of the program planning and execution. Thanks to our meticulous work on clients' requirements and expectations, and to the invaluable support of our partner institutions, Trentino becomes **an open-air school and laboratory**.

We are eager to create with you meaningful and rewarding learning experiences!

OUR SERVICES

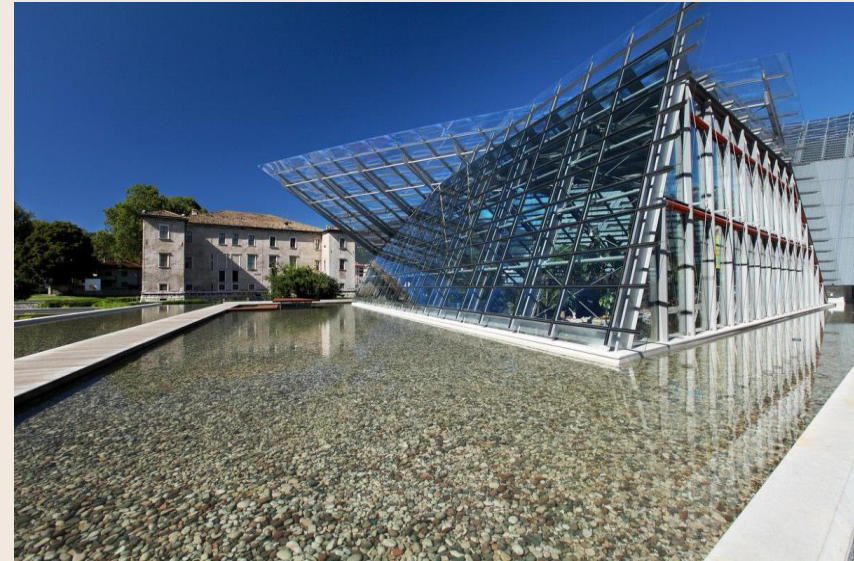

Dolomit is committed to provide clients with the top-quality logistic, safety and educational services needed for a successful study abroad experience in Trentino. We are able to accommodate groups of any size, for programs of different durations and contents, all year round.

The services that we offer to study abroad advisors, faculty and students include:

School facilities	Guided excursions and visits
Room and board	Orientation sessions
Transportation	Student advising and tutoring
Resident advisors	Italian language courses and survival classes
24-hour emergency assistance	Content courses taught in English

All participants of our programs also receive the [Trentino Guest Card](#), a pass that offers them unlimited use of local public transportation and free access to several attractions.

SAMPLE LOCATIONS AND FACILITIES

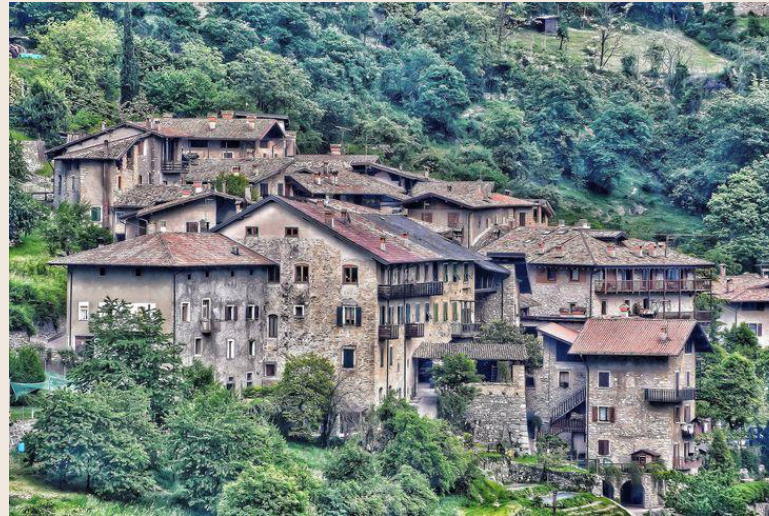

The capital city of Trento

The **largest urban center in Trentino** (120,000 inhabitants) is the seat of major academic institutions, museums, services, businesses, and innumerable points of interest. It is **centrally located and well connected** with the rest of Italy, Austria and Germany. Students and faculty can be hosted in a **variety of accommodations**: hotels, guest houses and, during the summer, self-catered university dormitories. It is an ideal location for programs in all academic fields, and for groups that prefer **a livable urban setting**.

The lively Garda Trentino region

A small urban area (40,000 inhabitants) on the northern shore of the major lake of Italy, Lake Garda: **a Mediterranean pocket in the Alps** with a unique landscape and a world-class outdoor and sport scene. All major services are available in the area, which is also a renowned destination for European tourists. Participants are hosted in family-run hotels and self-catered apartments, and can enjoy the new facilities of the local campus of our partner **LABA**, an independent college of art and design. It is an ideal location for programs in all academic fields, in **a vibrant and scenic setting**.

The historic hamlet of Canale di Tenno

A well-preserved **medieval village overlooking Lake Garda**, at a walking distance from a small alpine lake, and just a few miles from the urban area of Garda Trentino. It hosts the **Giacomo Vittone Artists' House**, a unique institution that operates as an art gallery, a studio, and a guesthouse. Participants are hosted in the Artists' House dormitories and, if necessary, in apartments and bed & breakfast inns. All basic services are available in the village, including a grocery store, bars, restaurants, and public transportation. It is an ideal location for programs in the fine arts, humanities, and environmental studies, and for portions of longer stays, in **a slow-pace historic setting close to major facilities**.

The protected area of the Adamello-Brenta mountain range

The **Adamello Brenta Nature Park** is one of the most valuable and appreciated mountain preserves in the world, and enjoys [multiple recognitions by UNESCO](#). Its facilities include the **Villa Santi Nature House**, a restored traditional rural building in the woods at an altitude of 3,900 feet. It is a LEED certified building with state-of-the-art facilities: bedrooms, classrooms, both indoor and outdoor laboratories. A full-board service based on local products is also available. The closest village and bus stop is only 0.7 miles away, and is reachable via a paved mountain road. It is an ideal location for programs in the natural sciences and environmental studies, and for segments of longer stays, in **a traditional and comfortable alpine setting**.

SAMPLE PROGRAM SCHEDULES

We carefully tailor every package to the academic and travel needs of faculty and students. The following itineraries exemplify the countless options available to build rich and diverse learning experiences with us.

Sample 2-Week Program
